PROJECT SCOPE

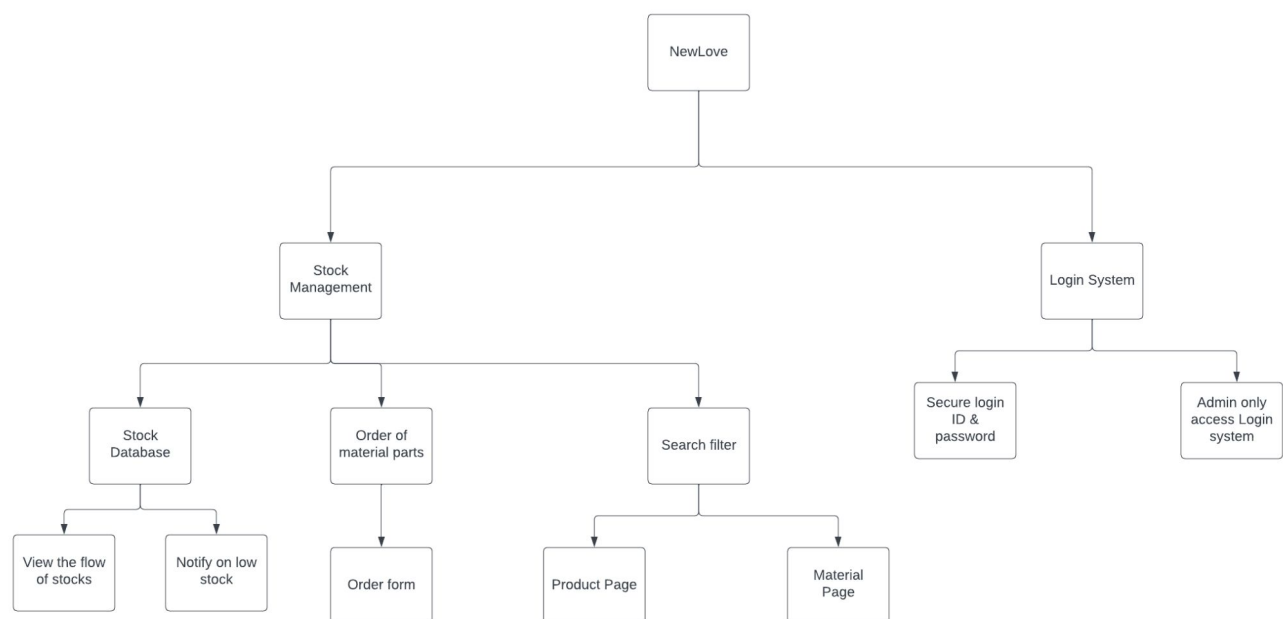

1. Document Definition

The document serves as New Love's System **FINAL** Acceptance Test for both iteration 1 and iteration 2. Please test and agree that it meets all the business objectives you expected. Please make notes on any discrepancies.

2. Project Overview

This document serves as a guide for evaluating the successful implementation of the Inventory Management System. Designed to cater to the specific needs of the business owner, this system encompasses the features aimed at transforming inventory management. The system enables efficient product addition, updates, and stock level adjustments, minimizing stockouts and overstocking issues. The stock level notifications feature provides timely alerts to the business owner, ensuring proactive inventory replenishment. The integrated supplier database simplifies supplier management by allowing seamless addition, modification, and removal of supplier details. This database also facilitates effective purchase order management, fostering smooth supplier interactions. Furthermore, the system's capacity to furnish comprehensive lists of product components offers invaluable insights into the composition of finished products. This feature aids production planning and optimizes inventory control by facilitating an understanding of the raw materials required for each product.

The following functional decomposition diagram shows all the system functionalities that your system includes , so far.

ACCEPTANCE TEST PLAN

(ADMIN)	Pass/Fail	Comments
INVENTORY MANAGEMENT (Product)		
Be able to add, update and delete material and product colours to the system.	PASS	
Be able to add, update and delete product collections to the database.	PASS	
Be able to add, view, update and delete products/product details to the system (including pictures)	PASS	
Display list of products added to the system.	PASS	
Be able to search and filter product results easily. (categorised by name, colour and collection)	PASS	
Be able to add, update and delete product inventory details (product and quantity)	PASS	
Be able to sort product inventory table by quantity or product name	PASS	
Be able to select the available options using drop-down menu when adding new product	PASS	

ACCEPTANCE TEST PLAN

(ADMIN)	Pass/Fail	Comments
INVENTORY MANAGEMENT (Material)		
Be able to add, view, update and delete materials/materials details to the system (including pictures)	PASS	
Display list of materials added to the system.	PASS	
Be able to search and filter material results easily. (categorized by name, and colour)	PASS	
Be able to add, update and delete material inventory details (material and quantity)	PASS	
Be able to sort material inventory table by quantity or material name	PASS	
Be able to see what products have an inventory of 1 or 0 by clicking bell in top right of all pages	PASS	
Be able to update the materials inventory automatically and instantly when quantity of associated products been updated	PASS	

ACCEPTANCE TEST PLAN

(ADMIN)	Pass/Fail	Comments
INVENTORY MANAGEMENT (Supplier)		
Be able to add, view, update and delete suppliers/suppliers details to the system	PASS	
Be able to filter the table of suppliers using search box	PASS	
Design		
Be able to add the components and view what materials can been used to make the product	PASS	
Be able to "update" the recipe of the product. (quantity and materials being used)	PASS	
Be able to see what raw materials are low on stock using the notification system	PASS	
Security		
Provides a login system to ensure security	PASS	
Restricts unauthorized users from accessing the website or system	PASS	
Be able to receive automatic email and reset password if users forgot the login credentials	PASS	

CLIENT SIGN OFF

I, Andrew Moran, have reviewed and approved the functions of entire system described in this report and are happy that they currently fit my business needs.

Hereby, I accept the system so far (including all the available functions) designed by P&V (Power & Vision) Team

OR

I have reviewed and approved the entire system dependent on the following changes:
