

Website URL link: <https://newloveprojectdev.u23s1022.monash-ie.me/>

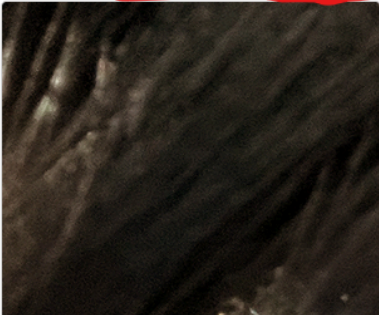

Viewing first into the website a home page like above with two navigation buttons home and shop with sub navigation button will be shown and the picture of the 3 types of button.

Displaying 3 categories, view product, view material, and view supplier.

Clicking the “view products” button will direct you to a page consisting of a list of products where we can see the image of each product.

We can select the product and click on the “View option” button to see more detail of a certain product.

Submit

A new product button is present for the admin to add any new product that would be available and the admin can easily fill in the details and submit and the new product would be added.

Upon clicking the button, it will lead to more specific detail of the product which includes the A list of actions such as edit/ delete, list and new product as the navigation.

A picture of the chosen product will be displayed with the product information such as:

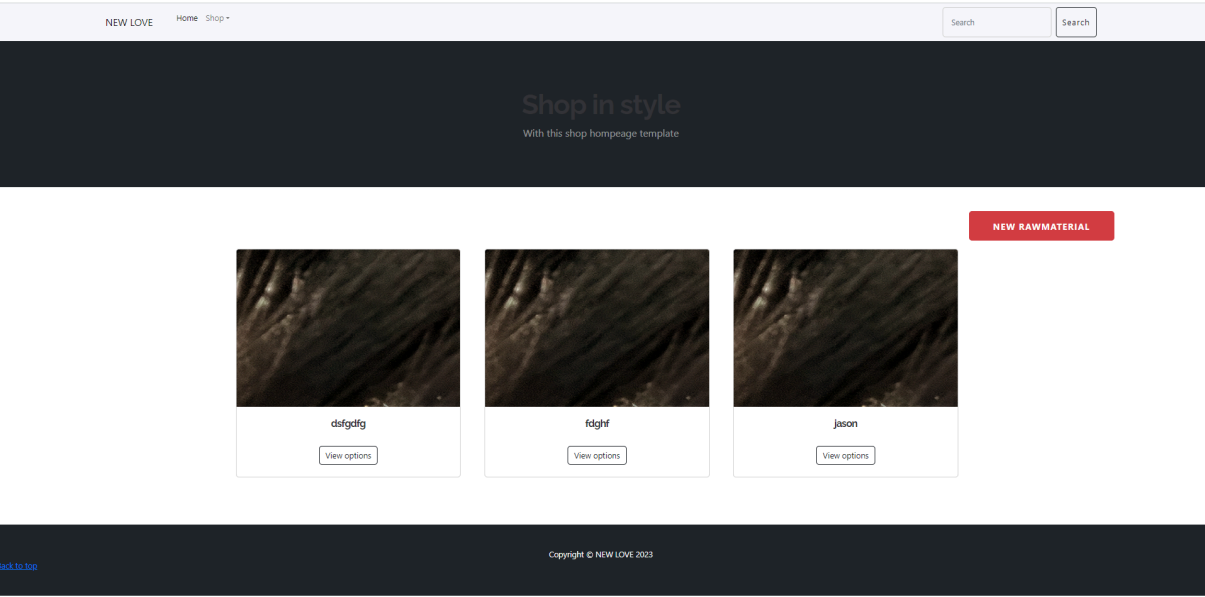

Stock on Hand (how much stock is left)

Collection (which collection is the product from)

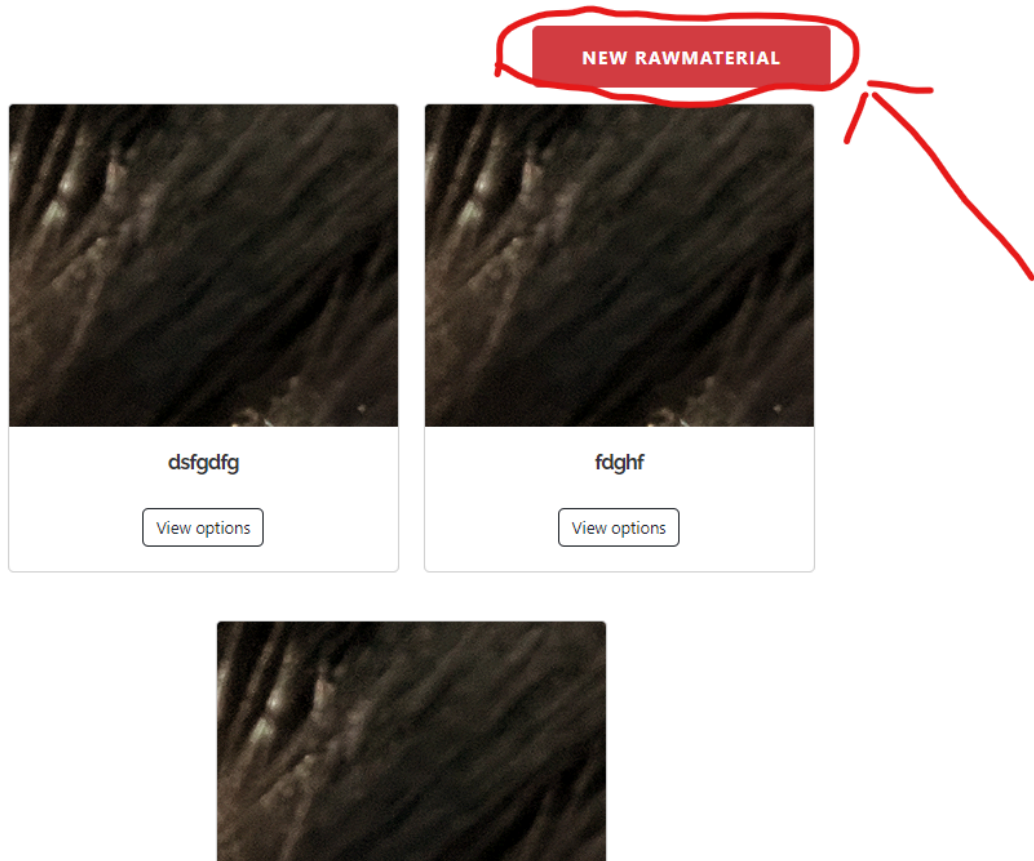

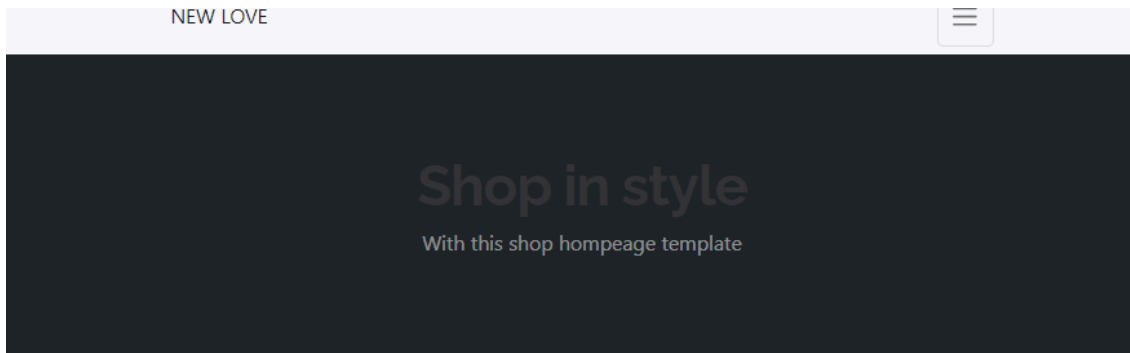

Colour (colour that the product have)

Description of the product

Clicking the “view material” button will direct you to a page consisting of a list of material to make up a certain product.

Clicking the “view supplier” button will direct you to a page consisting of a list of products.

Same as the product a "View options" button is clickable and new raw material could be added with entering the details.
